REYON LAU JIEMIN

Backend Developer (Laravel / PHP)
Pagedangan, Tangerang, Banten | +62 852-1153-0920 | liurey55@gmail.com | github.com/Reyonl

PROFILE

Informatics Engineering graduate (GPA 3.56) focused on Laravel and PHP backend development. Experienced in building multi-tenant systems, REST APIs for web and Android clients, relational MySQL schemas, Midtrans payment integration, and automated testing with PHPUnit.

INTERNSHIP EXPERIENCE

Pusdiklat BPS (Statistics Indonesia) - Public Relations Intern January - March 2026

Database Administrator & Creative Team

- Managed internal databases for the Public Relations division, validating training participant records and institutional archives.
- Worked with the creative team on content curation, event documentation, and memoir publication for the retiring agency director.

PROJECT EXPERIENCE

SayWed - Digital Wedding Invitation SaaS Platform 2026 - Present

Stack: Laravel, Filament PHP, MySQL, Tailwind CSS, Alpine.js

- Built a multi-tenant wedding invitation SaaS platform using Laravel and Filament v3 with separate admin backoffice and couple workspaces.
- Implemented guest RSVP reservations with duplicate detection, spam rate limiting, and atomic concurrency checks on attendance quotas.
- Created a memory-safe ImageOptimizer pipeline converting uploaded photos to WebP, verified with PHPUnit tests.

Warung Lupi - Retail POS & Bookkeeping System (Web + Android) 2025 - 2026

Stack: Laravel, PHP 8.3, MySQL, React, Flutter, REST API

- Built a Laravel REST API to sync catalog data and sales transactions between a React web dashboard and a Flutter mobile POS app.
- Developed customer credit tracking (receivables), automated promo rules, and daily profit/loss reports used in live store operations.
- Resolved shared hosting connection dropouts by adding client-side request retries with exponential backoff.

Gadai Enoni Cell - Pawnshop Operations Management System 2025

Stack: Laravel, PHP 8.2, MySQL, Midtrans Snap

- Integrated Midtrans Snap payment gateway and webhook verification to process online loan redemptions and contract extensions.
- Built core pawnshop workflows including item appraisal, tenor-based interest calculation, collateral auctions, and multi-branch cash balancing backed by database transaction locks and collateral state checks to prevent double payments.

DAILY.CO - Custom Apparel Ordering System (Undergraduate Thesis) 2025 - 2026

Stack: Laravel, Livewire, Fabric.js, Tailwind CSS, MySQL

- Built a web ordering platform with an interactive Fabric.js canvas editor so customers can place artwork directly on mockups, paired with dynamic print-area pricing and admin approval before printing.
- Wrote PHPUnit unit and feature tests against MySQL to validate uploaded design files, price calculations, and order integrity.

TECHNICAL SKILLS

Backend & Database: PHP 8.3/8.4, Laravel, Filament PHP, Livewire, REST APIs, MySQL, SQLite, Midtrans Snap, Composer
Frontend & Mobile: Blade, Tailwind CSS, JavaScript, TypeScript, React, Next.js, Alpine.js, Flutter
Tools & Hardware: Git, GitHub Actions (CI/CD), Docker, Postman, PHPUnit, Bluetooth Thermal Printer
Concepts: MVC Architecture, Relational Database Design, Multi-tenancy, Webhook Integration, Automated Testing

EDUCATION

Universitas Pamulang - Bachelor of Informatics Engineering (GPA 3.56 / 4.00) 2022 - 2026

Thesis: Web-Based Custom Apparel Ordering System with Interactive Canvas Design Editor (Laravel, Livewire, Fabric.js).

CERTIFICATIONS

BNSP Certified Web Programmer - Badan Nasional Sertifikasi Profesi (Valid for 3 Years) April 10, 2026
